Project Overview:

KINETICS 5 is a conceptual UI/UX exploration for a sci-fi/cyberpunk first-person mobile shooter.

The main goal of the project is to create a clear, fast and comfortable interface system tailored for touchscreen phones — so that even

Technical Overview: Role: UI/UX Design & Visual Direction
Platform: Mobile

Scope: Start Screen, Mission Loading, Main Lobby, Loadout System,
Gameplay HUD, Victory / Defeat, Settings, Operation Summary.

Tools: Figma,
Nano Banana AI

Design Principles

Quick Decisions

Clear hierarchy and large buttons — the player makes decisions in fractions of a second.

Scalability

Every element is built like a modular constructor. It's easy to add new characters, weapons, or modes without breaking the interface.

Thumb-Friendly Design

All critical buttons are placed within comfortable reach of the thumbs. Nothing obscures the screen during combat.

Main Lobby

Logic: Centralized character focus with key stats (Level/Power) placed directly above the Play button for instant combat readiness. UX: Streamlined navigation with a dedicated Mission Card for quick task overview and a stacked sidebar for core menu access.

Agents & Loadout

Logic: Segmented progress bars enable instant recognition of character/ weapon archetypes. Visual weight serves as the primary indicator of balance within the game ecosystem.

UX: Implemented Progressive Disclosure to balance high-level stats with deep sub-menu customization. Locked states drive long-term Retention and meta-game engagement.

Armory System

Logic: Dynamic Attribute Mapping prioritized by equipment type — swapping standard damage metrics for utility-specific data (Fuse/Radius) to

transitions between weapon tiers
without increasing cognitive load.

Combat HUD

Logic: Vitals placed at the bottom keep the center clear for combat; unified Ammo/
Tactical tracking provides a single focus in high-stress moments. **UX:** Collapsible
mini-map maximizes FOV on demand; high-contrast indicators ensure quick
readability without blocking the view.
